

Description:

It is a dedicated equipment for refrigeration systems, ideal for monitoring the operation of refrigerators, coolers, fridges, or thermo-sensitive material storage systems.

Easy installation:

Its Plug and Play connection allows the user to install and configure the equipment in a simple way.

Dimensions (H x W x D):

12cm x 17.5cm x 5cm.

Technical Specifications:

The equipment has 3 temperature probes that allow readings in a range from -55 to 150 °C, it also has a current sensor for monitoring the compressor behavior, allowing readings of up to 30 Amperes, and finally, a door sensor that detects if the equipment's door is open for a long time to prevent refrigeration losses.

Applications:

- Medical sector
- Agro-industrial
- Mining
- Productive sector
- Service companies
- Food sector
- Industrial sector

Variables:

Temperature

Motor current

Door status (open/closed)
