

Description:

This device has 4 inputs that allow pulse counting with a frequency of up to 10 Hz per channel. The device has internal memory that can store the number of pulses detected for each input. The inputs can be configured with pulse scaling, making it a quantifiable variable.

Easy installation:

Its Plug and Play connection allows the user to install and configure the device in a simple way.

Dimensions (H x W x D):

12cm x 17.5cm x 5cm.

Technical Specifications:

The inputs can be configured as dry contacts or as 5-24 volt DC inputs.

Applications:

- Medical sector
- Agro-industrial
- Mining
- Manufacturing sector
- Service companies
- Food sector
- Industrial sector

Variables:

Dry contact pulses 5-24
volt DC pulses
