

Description:

This equipment model allows for the connection of 4 digital inputs that can be configured as independent inputs or dry contact inputs from 5 to 24 volts DC.

It is ideal for alarm monitoring, state change (ON/OFF), or variation. The state signals are sent to Fractal One, where alarms and tasks can be triggered for early intervention in incidents.

Easy installation:

Its Plug and Play installation allows the user to install the equipment and configure it easily.

Dimensions (H x W x D):

12cm x 17.5cm x 5cm.

Technical Specifications:

It can simultaneously and independently measure 6 direct signal inputs from assets with ON/OFF type outputs or signal indicators.

Applications:

- Medical sector
- Agro-industrial
- Mining
- Production sector
- Service companies
- Food sector

Variables:

Digital inputs of 5-24 volts
