

## Description:

This device allows you to connect up to 12 devices through its Modbus RTU protocol and its various types of reading functions. Ideal for integrating pre-existing distributed Modbus RTU networks in industries.

## Easy installation:

Its Plug and Play connection allows the user to install and configure the device in a simple way.

## Dimensions (H x W x D):

12cm x 17.5cm x 5cm.

## Technical Specifications:

Easy protocol configuration through the internal configuration page, it also allows linking various types of variables:

- COIL STATUS
- INPUT STATUS
- HOLDING REGISTER
- INPUT REGISTER

## Applications:

- Industrial sector
- Mining
- Production sector

## Variables:

All types of variables that are stored in the master's network memory.
