

Description:

This device allows the input of 4 dry contacts that are connected in parallel with the asset's ignition.

The device will start recording the hours of asset usage as it is turned on. Its inputs are configurable, and a default value can be set for each counter already registered on the machine at the time of installing the device. It also allows independent counter reset from the screen.

Easy installation:

Its setup is really easy to implement, and its plug-and-play connection allows the user to install and configure the device easily

Dimensions (H x W x D):

12cm x 17.5cm x 5cm.

Technical Specifications:

Each counter allows counting from 0 up to 9999 hours of usage, sends data to the Fractal One platform, and is stored in an accumulator counter in the monitoring module for the activation of preventive tasks on the machines.

Applications:

- Medical sector
- Agro-industrial
- Mining
- Productive sector
- Service companies
- Food sector
- Industrial sector
